

## Beso

**Khodi Feiz** | Design 2015

The newest addition to the highly successful Beso family is a collection of swivel bar stools. This collection is available in a height adjustable version with gas spring and two fixed height versions. A comfortable upholstered seat mounted on powder-coated pedestals adds to a modern and pure image.

Beso, Spanish for 'kiss', is a highly versatile chair family, created by designer Khodi Feiz. Our Beso collection already included a chair, armchair, lounge chair and barstool. The swivel base option for the barstool is a perfect extension of the Beso collection.

With Beso, designer Feiz broke new ground for Artifort. This innovative family of chairs reflects a production approach that is economical without compromising on design or comfort. 'The notion of lightness, flexibility and comfort is what I like about this collection of chairs,' explains Feiz. 'The Beso takes an innovative approach to construction and upholstery. This allows us to dress the chairs using a hidden zipper system.'

Beso is available in a wide range of upholstery and base options, which makes it the perfect addition to any interior.

## **Construction**

The bar stool, already available with a four-leg and sledge base, is now also available with a disc-shaped base. The swiveling base is available in two different seat heights, 61 cm. and 81 cm., with a footrest and return mechanism. There is also a version with height-adjustable seats between 60 cm. and 80 cm. high. This adjustable bar stool is swiveling but does not have a return mechanism. All bases are powder-coated.

## **About Khodi Feiz**

Khodi Feiz is an industrial designer who was born in Iran and grew up in the USA. A graduate of Syracuse University in New York, he moved to the Netherlands in 1990 to work for Philips Design. In 1998 he founded Feiz Design Studio, together with graphic designer Anneko Feiz-van Dorssen. They specialize in the fields of product design, furniture design, graphic design, and strategic design for companies such as Alessi, Artifort, Herman Miller, Offecct, Nike and Nokia. Feiz's work has received numerous awards and has been featured in exhibitions and publications worldwide.

The overriding inspirations for Feiz's work can be summed up by: Clarity, concept and context.

## **About Artifort**

Since 1890, Artifort has been producing furniture that appeals to generation after generation. Iconic classics by designers such as Kho Liang le, Pierre Paulin, and Geoffrey D. Harcourt established the essence of Artifort. Under the supervision of art-director Khodi Feiz, the following generation of international top designers such as Studioilse and Claesson Koivisto Rune continue this development, which is characterized by colourful, original and recognizable design. Through its use of innovative production techniques, Artifort is able to make sustainable quality furniture for this generation and the next.
