Round is a collection defined by its search for structural balance and soft lines, an interpretation of outdoor space that conveys both natural simplicity and stylistic refinement.

Round favours rounded shapes for chairs in which one can be seated with great comfort.

code 479, 480

Tables that measure over 250 cm when extended might have a slightly bent surface, due to the small tolerances required for the sliding elements. This may not be considered a limitation to performance.

code 480

HPL tops are subject to slight warping as climate conditions vary. For this reason, differences in alignment may occur between the various components of the table. This has no effect on performance.

The sunbeds can be stacked on top of each other, and are available with or without a padded cushion.
