

Standard fabric collection

Explanatory notes to fabric list

Why use stretch categories? It is very important to Artifort that the upholstery of its chairs and sofas satisfies its high quality requirements. That is why not all fabrics are suitable for every model, for instance because the fabric is not stretchy enough to be able to follow the contours of the chair or sofa. Artifort therefore allocates stretch categories to fabrics and furniture. There are five stretch categories: categories 1 to 4 have increasing levels of stretchiness, while category 5 contains only leather. Leather has a separate category because it behaves differently from fabrics. After all, it is a natural product. The price pages show the stretch categories applicable to the piece of furniture concerned, under each image.

Standard fabric collection & non-standard fabrics

The price list includes a selection from the collections of our fabric suppliers: our standard fabric collection. At www.stoffenkiezer.nl you can also find price information and details of the stretchiness of a number of fabrics. If you cannot find your preferred fabric here, please contact our office. The stretch category of many of the fabrics not included in our standard collection is already known. If this is not yet the case, we would like to receive a sample (50 cm x 50 cm) so that we can assess the stretchiness.

Sale of loose fabrics

Artifort works alongside various fabric manufacturers. If desired, customers purchasing an Artifort piece of furniture may order additional lengths for the upholstery of an accessory or other piece of furniture in the same fabric. Please note that we charge €50 (after tax) for handling costs. Unfortunately, it is not possible to purchase loose fabrics at Artifort. If you wish to purchase loose fabrics, please contact the appropriate fabric supplier.

More information on fabrics

For more information about the substances and colour samples, please visit www.stoffenkiezer.nl. Naturally, you can also check the websites of our fabric suppliers:
