Synchro-top system

This operating system enables stoppers within all casters to rise and lower automatically with the movement of the tabletop. This safety device prevents accidents due to forgetting to lock the casters. Easy to set up and store away this table with a simple lever action.

When the tabletop is flipped up, the stoppers rise and make the table movable.

When the tabletop is leveled off, stoppers come down and grip the floor at 4 points, which ensures high stability.

Features

Wide levers

A light touch of the wide levers makes it is easy for anyone to release the locking system when reconfigured.

Safety device

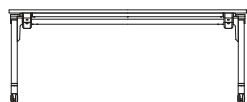

No space for the fingers to get caught in the folding mechanism because it is completely covered with the aluminum and resin parts.

Symmetrical design

Symmetrically designed table can be also used for face to face meetings.

Specifications

Tabletop	Flash structure, Melamine surface, ABS edge
Modesty panel (Option)	ABS extrusion
Shelf (Option)	φ15.9mm Steel pipe, Melamine resin baking finish
Leg	64mm×45mm Steel square-bars pipe / Aluminum die-casting, powder painting
Casters	φ60mm Urethane casters with synchronized stopper
Patent	USA, Japan
Design patent registration	USA, EU, Japan

Storage size

Tabletop	Storage width	Storage depth	Storage height
D : 450mm	W + 150mm	(Storage pitch : 145mm) × N+325mm	850mm
D : 600mm	W + 200mm	(Storage pitch : 145mm) × N+475mm	925mm
D : 750mm	W + 200mm	(Storage pitch : 145mm) × N+475mm	1000mm
