GOOD DESIGN AWARD

Are you comfortable using a typical chair with a writing tablet?

Often the tablet is too small, unstable and confusing to use and does not work for left-handed users. The desks can be too heavy for easy access and occupy too much space when not in use.

Tipo Board is a stylish tool designed as an alternative solution to the negative aspects of both tablet chair and the typical lecture desk. This sleek design created new styles in training and educational environments.

Features

Light-weight design

This light-weight stacking desk composed of steel pipe and high impact resistant resin is only 6 kg, allowing easy storage and reconfiguration without the caster.

Wider workspace

The wide size of the workspace with W600mm x D450mm is completely stable and easy to access.

Handgrip hole

The hand grip hole in the front panel is not only a beautiful design but also a helpful function to move the desk safely.

Stylish bag hooks

The hooks at both ends of the top are for hanging your handbag.

High-Density stacking

The slim light-weight construction enables stacking efficiently up to 30 high on the dolly and 10 pcs on the floor.

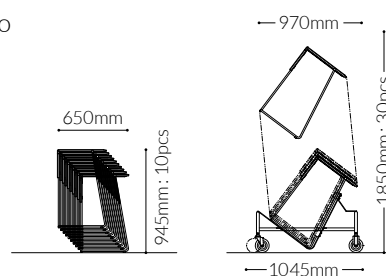

Felt glide cap (Option)

The felt glide cap is an available option to attach to the existing glide.

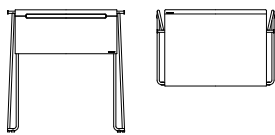

Stackcart

The specialized Stackcart itself for the Tipo Board can be stacked up to 4 pcs when not in use.
