

L O O P

simon

Loop is a contemporary interpretation of OLED technology. It inspires the creation of spaces using shapes and light, either as a single luminaire or in a group. Loop gives any space a unique character, transforming the concept of indoor lighting and offering great creative freedom.

Antoni Arola design for Simon

LOOP

ORGANIC LIGHT

The new OLED technology allows for elegant design with minimal thickness. Loop is an excellent solution for decorating and illuminating hotels, residential and corporate spaces, as well as for formal and artistic installations, thanks to its versatile composition.

VISUAL COMFORT

Loop provides soft, diffuse light with great visual comfort that contrasts with shadows. Loop creates lighting effects on the wall and can be rotated in any direction to produce multiple visual combinations.

360° ORIENTATION

Loop is versatile. The 360° orientation allows the light to be directed in different directions, increasing the configuration possibilities. Depending on the desired environment, Loop can illuminate specific areas uniformly and regularly, or can be distributed in groups across the surface of a space, where the balance between the light and the appearance give the space a creative value.

COMPOSITIONS

Loop offers many possibilities for lighting direction and finishes. Designer Antoni Arola proposes decorative groupings that allow walls to be illuminated, creating a visual play of light and shadow.

X-Less system. See page 208

INTEGRATED IN SPACE

The new patented X-Less installation system allows the luminaire's seamless integration into the wall, ensuring excellent lighting quality and avoiding any surface imperfections. It's ideal for the most demanding interior design projects.
