

## CTZ

CTZ sets new standards in the design of flip-top tables for meeting, conference and training rooms. Designed by Taku Kumazawa to complement the DAYLIGHT stacking chair program. Winner of the Good Design Award in Japan, CTZ flip-top tables incorporate straight line structural beauty with smooth operation and handling. The unique leg design uses die cast aluminium to achieve high precision with a durable glossy finish. The CTZ Table base is certified by GECA as an environmental alternative. The patented synchro top mechanism of CTZ enables the leg stoppers to rise and lower within the height adjustable castors with the movement of the table top. Hooks are standard on both ends of the CTZ flip-top table. With the top folded down, a basic storage shelf is created below. An optional cable management system and optional modesty panel is available for all three CTZ flip-top table widths and does not impair flipping the top or stacking. The parallel stack design enables the CTZ flip-top table legs to stack tightly together.

### FINISHES AND COLOURS

White, grey or light wood melamine top with ABS edging. Silver or white powdercoat frame. Optional dark grey modesty panel.
