

DTN

DTN is Aichi's new collection of multi-purpose tables with smart bag hooks, designed by Taku Kumazawa's father. The table combines the use of glides and castors available in various combinations making them versatile and functional for conference and training purposes. The tables are available in 2 different sizes with square or rectangular tops. The legs can be specified either on 4 glides, 4 castors or 2 glides and 2 castors. The frame is made from aluminium steel available in white or silver powder coat. The light-weight table top is manufactured in white, grey or light wood melamine with ABS edging. The tables unique features are the 4 hanging hooks on each corner of the table allowing the users hand bags etc. to be kept off the floor.

FINISHES AND COLOURS

White, grey or light wood melamine top with ABS edging.
Aluminium & steel structure in white or silver powder coat.
