

Drum

Design Simon Pengelly

Drum is a comprehensive versatile and especially comfortable group of 'tub' chairs featuring slender and elegant upholstery in three sizes of shell, including a high back tub and large low lounge chair versions. All are available in a choice of three base options: an elegant fully upholstered 'floor length' version presenting several upholstery choices; a single column cruciform base, fixed on castors or swivel on glides in a choice of finishes; and a 4-leg wood base in natural oak, which can be stained.

Drum is intended for use across a wide range of dining, meeting and waiting applications such as hotel lobbies and bedrooms, corporate meeting, reception and dining areas, and wherever people congregate and meet.
