

MIR

Design Mark Gabbertas

MIR is public area modular seating; molecular in concept, and highly flexible, utilising 1500mm. round 'hubs' with or without a central back support, and having one, two or three exit points from which straight benches emerge to link to other hub units or to additional benches. These configurations can be accompanied by the complementary low stool or aluminium table, absolutely suited to notebook and laptop use or for resting drinks.

There are three lengths of bench and all seating pieces are fully upholstered and spaced off the floor by discreet supporting, powder coated steel feet with nylon glides. The 'laptop' table is available powder coated in either matt white or matt black as standard. All elements can be used separately and individually including the 'satellite' stools.

MIR offers the designer full rein in creating different configurations of layout and the opportunity to 'play' with fabric colour on the different elements.

MIR is ideal for use in spaces where people gather in numbers; hotel foyers, transit lounges, Student Unions and atria of all kinds.
